

Clamps, markers and tags

Steel bandings' first outing

Banding and Identification Solutions (Band-It Products), the African distributor of United States-based Band-It – a manufacturer of a full range of steel banding and buckle systems, preformed clamps and cable ties for numerous applications – will celebrate its inaugural Electra Mining outing by launching two new products, in addition to exhibiting its products that have been tried and tested in the local market.

Business manager Rosa Remendos says the company has developed a strong reputation in the local mining sector, which she believes will be further bolstered by exhibiting at the show.

Among the new products to be launched is the new Band-It Pro-Mark pin marker. Remendos says it helps

Banding and ID Solutions

end-user businesses in mining to save money by creating their own tags for identifying products and parts.

The Band-It Pro-Mark pin marker is available with programmable LCD, and has a USB option for connecting to a PC or laptop..
