

Band it

REF: MMPR 83

Benefits to the industry: The Ultra-Lok UL4000-C Application Tool available through Banding & Identification Solutions, has been used extensively in the mining industry. The tool is ideal for hose clamping, and has been designed to replace band and buckle systems in high volume applications.

Sustainability: It is powered by a Lithium-Ion battery which holds a charge for longer with consistent peak performance through the life of the battery.

Backup service: Aftersales service and training are available from Banding & I.D. Solutions.

Maintenance: Repair and maintenance services are available. [mmpr](#)
