

## SUPPLY CHAIN NEWS

Heavy duty Doosan DX340LCA hydraulic excavators, designed for efficient operation and high productivity in demanding work environments, are gaining popularity in diverse sectors such as quarrying, mining and heavy construction. There are currently more than 2 500 Doosan machines in operation locally. The company expects to further consolidate Doosan's market position and soon reach the 3 000-unit mark locally.

Cable theft is fast becoming a national crisis in South Africa. The security of any traditional cable installation can be increased by applying an Ultra-Lok clamp to every 150mm of cable. The product is available from Banding and Identification Solutions Africa, the African distributor of US based Band It.

Konecranes' new rail mounted gantry crane, the Boxporter, offers the clearest view in intermodal container handling with its 'smarter cabin', giving the operator superb visibility and comfort. It also gives the operator an extended view to both truck and train loading and unloading, as well as container stacking, thanks to video and control information displayed on the cabin monitor.

Tile and construction adhesive products manufacturer **TAL**, has proven its commitment to environmental responsibility and sustainability after being awarded internationally recognised ISO 14001 environmental management certification. TAL manufactures and supplies innovative quality products to the construction industry, focusing on tile adhesives, grout, waterproofing and construction chemicals. TAL is a division of Norcros SA.

Norcros SA group SHERQ (safety, health, environment, risk and quality) manager Julius McMaster, says the company is the first in its industry to gain full ISO 14001 certification.
